GAS VENT 10" – 30"

CERTIFICATION

- Listed by Underwriters Laboratories of Canada, File Number CMH 609.
- Listed by Underwriters Laboratories Inc., U.S.A., File Number MH 12111.

APPLICATIONS

- ECCO Type B Gas Vent is a prefabricated metal vent to be used for venting approved gas burning equipment as specified by the authorities having jurisdiction and not for incinerators or heating appliances requiring connection to chimneys. Temperatures at the outlet of the appliance draft hood shall not exceed 470°F (245°C).

MATERIALS

- The vent consists of factory made parts, designed to be assembled without requiring field fabrication.
- The inner conduit and Rain Caps consist of an aluminum alloy of Type 1100 or Type 3003.
- The outer casing consists of Galvalume steel conforming to the latest revision of ASTM A792, AZ150.
- Vent accessories consist of Galvanized steel conforming to the latest revision of ASTM A653.

INSTALLATION

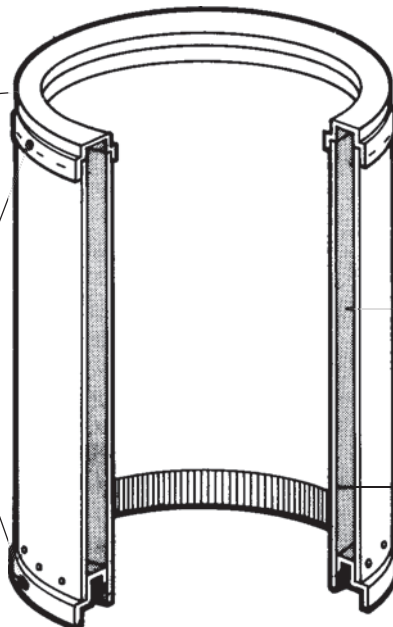

- Every 30 feet of vent height requires at least one Support Plate and Ring Assembly.
- The vent shall extend at least 2 feet above the highest point where it passes through a flat roof and at least 2 feet higher than any part of the building within a horizontal distance of 10 feet.
- The vent shall extend at least 2 feet above the highest point where it passes through a pitch roof of 9/12 pitch or less and at least 2 feet higher than any other obstruction within a horizontal distance of 10 feet.
- Clearance to combustible materials shall not be less than 1 inch.
- Except for installation in single and two family dwellings, gas vents which extend through any storey above that on which the connected appliance is located are to be provided with enclosures having a fire resistance rating equal to, or greater than, that of the floor or roof assemblies through which they pass.
- To ensure a safe and proper installation, install the vent using all the parts as specified in the *Installation Instructions*.
- Bird screens may be susceptible to blockage through freezing moisture in areas of low ambient temperature. Consult authority having jurisdiction.

DIE-FORMED COUPLINGS

- integrates the inner and outer pipe as one unit
- ensures consistent quality and fit

PRESTAMPED SCREW HOLES

- no drilling
- easy and quick assembly
- a positive and strong lock

OUTSIDE CASING OF GALVALUME OR GALVANIZED STEEL

- provides strength and durability

1" INSULATING AIR SPACE

- eliminates condensation, while keeping the outer casing cool

INSIDE CONDUIT OF ALUMINUM

- resists corrosion
