REPLACEMENT BLOWER PARTS AND DRIVES

TECHNICAL DATA

VOLUME PRESSURE BLOWERS — DIRECT DRIVE — WITH CLOCKWISE ROTATION

PRESSURE BLOWERS Direct Drive

Application:

Pressure blowers are generally used on industrial applications for small exhaust systems where air is laden with dust or grit and also for supplying high pressure air for conveying and cooling.

Features:

Wheels – Constructed with straight radial blades of heavy cast aluminum for self cleaning feature, dynamically balanced and designed for efficient operation.

Housings – Arc-welded 16 gauge steel housings and motor bases for rigidity and long life.

Motors – Standard units are furnished with open ball bearing, rigid mounted motors of either single phase capacitor-induction type or three phase induction type. Motors can also be furnished totally enclosed or explosion proof or with special current characteristics for special applications.

Rotation and Discharge – Furnished for clockwise rotation, bottom horizontal discharge unless otherwise specified. At time of installation housings or wheels may be turned for other discharges and rotation if so desired.

Capacities – Tested in accordance with AMCA Standards 210.
