CHIMNEY BRUSHES AND ACCESSORIES

Chimney Brushes

Imperial offers a complete line of flue cleaning brushes and accessories that enable the do-it-yourselfer to properly clean and maintain chimneys and stoves.

Imperial 3/8" NPT chimney brushes for wood stoves and fireplaces are available in black polypropylene (POLYSWEEP), round wire (SUPERSWEEP), and flat-wire (SWEEP'S CHOICE).

properly clean and maintain chimneys and stoves.

Imperial 3/8" NPT chimney brushes for wood stoves and fireplaces are available in black polypropylene (POLYSWEEP), round wire (SUPERSWEEP) and flat-wire (SWEEP'S CHOICE).

COMPLETE LINE OF BRUSHES AND ACCESSORIES

POLYSWEEP

The acids in coal, gas and oil flues will deteriorate steel bristles. The specially designed stiff polypropylene bristles of the Imperial **POLYSWEEP** brush resist these acids. Imperial **POLYSWEEP** chimney brushes, recommended for homeowners who use a brush occasionally, are especially suited for insulated metal chimneys, stainless steel or metal stove pipes where manufacturers recommend not scratching the flue.

These sturdy durable poly brushes will help prevent damage to older or more fragile chimneys. All **POLYSWEEP** brushes have a 3/8" pipe thread fitting.

SUPERSWEEP & SWEEP'S CHOICE

Imperial **SUPERSWEEP** and **SWEEP'S CHOICE** chimney brushes feature hand made construction. Their spindles have a 3/4" loop on one end and a 3/8" pipe thread on the other for easy coupling with fiberglass rods and pull rings. Each set of bristles is individually placed on the spindle and then positively locked as the spindle is twisted into an evenly spaced double spiral configuration. This thread and spindle design is also used on all **POLYSWEEP** brushes. Imperial

SUPERSWEEP and **SWEEP'S CHOICE** brushes come in a selection of round, square and rectangular shapes.

CHIMNEY BRUSH RODS

The best way to clean your chimney is with the **FLEXIBLE ROD METHOD** (brush & flexible rods). The brush is inserted top down through the chimney or bottom up through the fireplace damper or cleanout door. Flexible rods are added as necessary. Imperial fiberglass chimney cleaning rods come with 3/8" male threads on one end and female threads on the other. These rods are very popular with the do-it-yourself homeowner because of their high degree of flexibility.
