

NEW PRODUCT ANNOUNCEMENT

Stainless Steel Chimney Lining System

For installation into masonry chimneys, for venting oil, pellet, or solid fuel burning applications.

Applications

- In Canada, this lining system is to be used in accordance with the National Building Code, the installation codes for Oil Burning Equipment CAN/CSA-B139, and for Solid Fuel Burning Appliances and Equipment CAN/CSA-B365.
- In the United States, this lining system is to be used in accordance with the National Fire Protection Association (NFPA 211) Standard for Chimneys, Fireplaces, Vents, and Solid Fuel-Burning Appliances (NFPA 31); Standard for installation of Oil Burning Equipment.
- Designed for appliances with a maximum normal operating temperature of 538°C (1000°F) in the United States and 650°C (1200°F) in Canada.

Installation Clearances

- This lining system has been tested and listed to the clearances required in Table 1. Consult the authority having jurisdiction and local building codes to verify clearances in your area. If the building code/local authority dictates greater clearances, these must be respected.
