

MORE TO CHOOSE FROM

We are pleased to announce that we have added to our range of styles and sizes of Hot Water Heater Drain Pans.

Hot water tanks require a drain pan to be installed under the water heater to prevent damage if the heater leaks. Since a typical drain pan only holds a minimal amount of water, it must have a pipe to a drain or other outlet for the water. When installed properly, a drain pan and pipe will keep any tank leakage under control and protect belongings.

The brass tailpiece insert is also sold as a separate item if required.

Round Pan

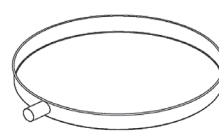

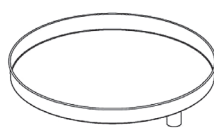

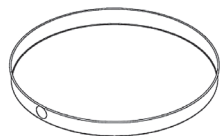

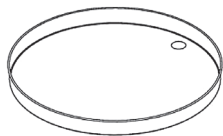

| Stock # | Description |
|---------|---------------------------|
| 138801 | 22" – 1" H BTM Hole Only |
| 138901 | 24" – 1" H BTM Hole Only |
