

# MIGHTY-RIGHT™

## RIGHT ANGLE IMPACT DRIVER

**Introducing...**

# The Smallest, Lightest, Most Maneuverable Impact Driver on Earth!

**Ideal for Driving or Removing Sheet Metal Screws in Tight Spaces and Blind Spots**

**7.2 VDC • 1/4" Hex Socket Drive • 1400 RPM • 140 in-lbs Torque**

Use the Mighty-Right™ to drive or remove sheet metal screws in tight spaces and blind spots encountered when installing metal duct work, including access into small diffuse boxes and equipment enclosures.

A unique LED light integrated into bit area sight line features a separate on / off switch.

An external belt-clip-mounted battery pack stays clear of work and won't weigh down or unbalance this one hand tool operation.

The 5-foot (1.5 m) battery cable provides generous reach.

Quick-connect jacks with positive locking tabs won't pull out. **(1)**

Ergonomic contours and a non-slip gripping area ensure easy one-hand operation.

With a fully charged battery, the Mighty-Right™ is capable of delivering 140 in-lbs. maximum torque to quickly seat sheet metal screws in steel up to 16 ga. (1/16" or 1.6 mm)

A handy knockout hole permits easy removal of a lodged bit. **(2)**

The hex socket drive shaft accepts any 1/4" hex shank bit.

Kit includes: two belt-clip-mount, lithium battery packs; a long-reach battery cable; and a 1-hour recharger in an HDPE (high density polyethylene) storage case.

Four low profile power bits are also supplied with kit: 1/4" and 5/16" Magnetic Hex bits and #1 and #2 Robertson square bits.
